

internet for medium and large business

TURN WIRELESS PROVIDES HIGH SPEED INTERNET ACCESS, GUARANTEED SUPPORT AND ENHANCED SERVICES DESIGNED TO GROW WITH YOUR BUSINESS.

As your business grows so does the need for reliable and quality internet services. Traditional T1 speeds of 1.5 Mbps are just not enough anymore when you consider the number of applications being run over the wide area network including internet services, VPN's, VOIP and other business critical elements. Although DSL has increased the ability to offer competitive pricing against T1 services; the high rates of oversubscription and service availability restrictions are not flexible or reliable enough to meet medium and large business requirements. In addition, traditional methods of increased bandwidth based on multiple T1 services are quite expensive with technology constraints toward network optimization, reliability and scalability. From scalability to enhanced services Turn Wireless truly cares about your bandwidth and business needs regardless of size, application or budget.

Our turnpipe products and services provide industry leading technology, guaranteed service level agreements and dedicated customer support designed specifically around your business needs. By providing cost-effective speeds up to 45Mbps and installation times of 7—10 days companies can leverage our network towards achieving their goals. In addition to high speed internet access our enhanced services provide QOS, proactive network monitoring, multi-homing wan optimization, load balancing, redundancy and failover built the way you want it, when you want it. With prices starting at \$349 per month for 2 Mbps scalable to 5, 10, and 20 Mbps we provide our customers with true bandwidth on demand. Get connected today and begin to enjoy why so many businesses are make the choice...turn wireless.
